### **DETAILED ACTION**

1. This action is in response to the two Notice of Allowances of August 24, 2005. The two notice of allowances were mailed out due to a miscommunication between two examiners during redocketing of the case. To clarify the record, the following action reaffirms Examiner Gordon J. Stock's Official stand; wherein, no amendment to **claims 31, 41-44, 48-50, 57-60, 171** has been made (the rejection of claims 48-50 under 35 U.S.C. 112 second paragraph have been withdrawn).

### ***Election/Restrictions***

2. This application is in condition for allowance except for the presence of **claims 64-143** to Group II non-elected without traverse. Accordingly, **claims 64-143** been cancelled.

### ***Information Disclosure Statement***

3. Information Disclosure Statement filed May 26, 2005 has been entered and considered by the Examiner.

### ***Allowable Subject Matter***

4. **Claims 1-2, 4-12, 14-17, 19-33, 35-60, 62, 63 and 144-175** are allowed.

The following is an examiner's statement of reasons for allowance:

As to **claim 1**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in an imaging method for detecting misalignment "providing radiation to illuminate the two periodic structures along directions that are substantially normal or near normal" with the particular collecting radiation step, in combination with the rest of the limitations of **claims 1, 2, 4-12**.

As to **claim 14**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in a method for detecting misalignment of two structures placed next to each other “causing relative motion between the apertures and detectors on one hand and the two structures on the other,” in combination with the rest of the limitations of **claims 14-15**.

As to **claim 16**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in an imaging apparatus for detecting misalignment “a source providing a beam of radiation illuminating the two periodic structures along directions that are substantially normal or near normal to the reference plane” with the particular collecting optics in combination with the rest of the limitations of **claims 16-17, 19-33**.

As to **claim 35**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in an apparatus for detecting misalignment of two structures two apertures and an instrument causing relative motion between the apertures and detectors in combination with the rest of the limitations of **claims 35-36**.

As to **claim 37**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in an imaging apparatus for detecting misalignment of two structures on two different planes placed next to each other with respect to a reference plane the particular collecting optics in combination with the rest of the limitations of **claims 37-44**.

As to **claim 45**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in an imaging method for detecting misalignment of two structures on two different planes and placed next to each other with respect to a reference plane using optics to collect radiation that are at different distances from the two structures with a particular numerical aperture in combination with the rest of the limitations of **claims 45-47**.

Art Unit: 2877

As to **claim 48**, the prior art of record, taken alone or in combination, fails to disclose or render obvious one or more detectors having an integration time less than 10 milliseconds and optics collecting radiation from the two structures and directing the collected radiation to form images of at least portions of the two structures on the one or more detectors which provide outputs, wherein the image of the portion(s) of one of the two structures is substantially distinct from the image of the portion(s) of the remaining one of the two structures, in combination with the rest of the limitations of **claim 48**.

As to **claim 49**, the prior art of record, taken alone or in combination, fails to disclose or render obvious a source providing pulses of radiation illuminating the two structures, wherein at least one of the pulses has a pulse width less than 10 milliseconds and optics collecting radiation from the two structures and directing the collected radiation to form images of at least portions of the two structures on the one or more detectors which provide outputs, wherein the image of the portion(s) of one of the two structures is substantially distinct from the image of the portion(s) of the remaining one of the two structures, in combination with the rest of the limitations of **claim 49**.

As to **claim 50**, the prior art of record, taken alone or in combination, fails to disclose or render obvious a source providing pulses of radiation illuminating the two structures, wherein at least one of the pulses has a pulse width less than 10 milliseconds and said source comprising a mechanical shutter with aperture time of less than 10 milliseconds, in combination with the rest of the limitations of **claim 50**.

Art Unit: 2877

As to **claim 51**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in an integrated processing and imaging apparatus the particular collecting optics in combination with the rest of the limitations of **claims 51-60, 62, and 63**.

As to **claim 144**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in an imaging method the particular imaging radiation and determining a misalignment steps in combination with the rest of the limitations of **claims 144-155**.

As to **claim 156**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in an imaging apparatus for detecting misalignment the particular imaging optics and particular processor in combination with the rest of the limitations of **claims 156-173**.

As to **claim 174**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in an imaging method for detecting misalignment of two periodic structures placed next to each other the particular imaging and determining steps in combination with the rest of the limitations of **claim 174**.

As to **claim 175**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in an imaging apparatus for detecting misalignment the particular imaging optics and particular processor in combination with the rest of the limitations of **claim 175**.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

Art Unit: 2877

5. Applicant's arguments, see Remarks, filed June 13, 2005, with respect to the rejection of the claims under 35 U.S.C. 103(a) and 35 U.S.C. second paragraph, have been fully considered and are persuasive. In view of the arguments and the amendment of the claims the rejection under 35 U.S.C. 103(a) and 35 U.S.C. second paragraph of claims 48-50 have been withdrawn.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
